PACKAGING GUIDELINES

YOUR PARCEL IS PRECIOUS. PACKAGE IT WITH CARE!

We know you want your consignment to arrive in pristine condition, so it's important that you package it correctly. Protect your parcel by following these simple guidelines.

THE CARTON

Size: Make sure this is appropriate to the contents. Overloaded boxes may burst; under-filled boxes are likely to collapse.

Strength: Choose boxes made of corrugated cardboard with good quality outer liners. Use heavy-duty, double-layered cardboard for valuable items. Check the weight specification of the box and do not exceed this limit.

Quality: Always use high quality materials. If reusing old boxes, ensure they are in a good enough condition to withstand transit and be sure to remove all old labels.

NOTE: Packaging made of fabric or plastic is not suitable.

We can supply you with reinforced, double-walled cardboard boxes which can be delivered to your door via a next day delivery service.

Visit our website to see what box sizes we have available.

PACKAGING SYMBOLS & LABELS

Never use boxes that have hazardous labels or symbols on them. Parcels with these symbols will be stopped by the courier and may incur fines.

We cannot guarantee that carriers will take notice of any 'This way up', 'Handle with care' or 'Fragile' labels. Please package your goods suitably to protect them regardless of orientation.

THE CONTENTS

CUSHIONING

Use materials such as bubble wrap, kraft paper and loose fill polystyrene to protect your items from moving or breaking. For fragile items, there should be at least 5cm of cushioning between each item, and also between the items and the carton wall.

PLACEMENT

Put fragile goods in the centre of a package, ensuring they do not touch the sides. Use cardboard dividers when sending flat, fragile material such as vinyl records.

REMEMBER

You should fill all remaining space in the box with additional cushioning material to minimise the impact of transit on your items.

SURCHARGES: Some carriers apply surcharges for certain kinds of packaging (e.g. if it's not a cardboard box) or if shipments are deemed "non-stackable" due to their shape or contents. See our website for more guidance.

SEALING & LABELLING

- Seal your items with a quality adhesive parcel tape.
- Do not strap boxes together. Each box should have its own label.

- Attach your label to the flat topside of your parcel. The barcode and shipping address should be clearly visible and not obscured in any way.
- Make sure your label is securely attached, especially when sending suitcases or holdalls. Labels do not stick well to fabric; if the label comes off, your item is likely to be lost!

TIP: We recommend placing a copy of your label inside your parcel. Should the label become detached from your parcel on the outside, this will help to determine its intended destination.

GENERAL GUIDE

WHILST OUR CARRIERS DO THEIR BEST TO HANDLE YOUR GOODS WITH CARE, WE DO ADVISE THAT PARCELS SHOULD BE SUFFICIENTLY PACKAGED TO WITHSTAND A DROP FROM WAIST HEIGHT ONTO A SOLID FLOOR.

ISPM 15

All wooden packaging sent to countries applying an ISPM 15 regulation must be heat-treated and stamped. We can advise if your shipment must comply and treat your packaging accordingly.

SHIPPING INFORMATION

Sending parcels overseas is easier than ever before. However, there are still some important things to bear in mind.

For more detailed information, please visit the [Help and Advice](#) section of our website.

DOCUMENTATION

Your shipping documentation is automatically generated for you as part of the booking process. The documentation required will vary depending on your destination and the service you choose. All parcels must be correctly labelled.

You will receive download links for your shipping documentation shortly after completing your order. You can also choose to receive your documents by email. Documents can be downloaded from your account at any time.

CUSTOMS ADVICE

All international shipments are subject to customs clearance.

We'll help you create your contents declaration. This will include details of the size, weight, contents and value of all goods within your consignment, as well as country of origin and relevant commodity codes.

Your customs invoice is usually submitted to the carrier electronically, but we'll let you know if you need to print anything off.

Additional documentation or licenses may be required for the import or export of certain goods. You will need to check the customs rules of the relevant countries before sending.

CUSTOMS OPTIONS

For most services, we ship under DDU (Delivered Duty Unpaid) terms as standard. This means that any applicable import duties, taxes and fees are payable by the receiver.

All customs charges will need to be paid by the receiver before your goods are released for delivery.

However, we also offer alternative options for some services. With DTP (Delivered Taxes Paid), any customs fees will be payable by the account holder, which may be preferable for businesses looking to keep things simple for their customers.

With the IOSS (Import One-Stop Shop) option for commercial shipments to EU countries, VAT is billed to the receiver at the point of sale rather than applied as import VAT, allowing for easier and quicker customs clearance.

TRACKING

All of our services are fully trackable. As soon as your parcel has been collected, you can easily track its progress on our website.

TRANSIT TIMES

We offer both express and economy delivery services, to suit every budget and time frame. When you book one of our services, your estimated transit time is displayed on the quote screen during the order process. These estimates are based on deliveries between major gateway cities and may vary from service to service.

While we enjoy a very high success rate, local bank holidays, adverse weather conditions and potential customs delays mean that transit times are not guaranteed. If your delivery destination is remote, your delivery may take longer.

For more information on transit times, please visit transglobalexpress.co.uk/information/transit-times/.

We ship goods to over 220 destinations, including major countries and tiny islands in the Pacific.

WEIGHING & MEASURING GUIDANCE

IMPORTANT

It is important to weigh and measure your parcel as accurately as possible when it is fully packaged and ready to send. If there are any discrepancies where weight or parcel measurements are concerned, carriers will pass on additional costs to the shipper.
